“Love for all, Hatred for none.”

Summary

Software engineer with 7.5+ years of experience. Enjoy collaborating with the different product areas: scrum, refinement, UI/UX. Have a passion for code craftsmanship and design. Love to make great products especially which impact on people's everyday life.

I value the following aspects from a company and role:

- Make things simple for challenging projects.
- Great values, teammates, and room to mentor.
- Next-generation technologies and their impact on software as a service.
- Growth opportunities, career plan, feedback, and goals.
- Focus on the end-users satisfaction, and QA.
- Data-driven decision making, analysis of metrics, and monitoring product usage in production.

Areas of Expertise

- Mobile Technologies: Android - SDK, ADB, DDMS, SQLite, Notification Services including Push, Location Services, Content Provider, System Services, Broadcast Receiver, Services, RESTful Web Services, HTTP, JSON, AsyncTask, Fragments, Maps
- Third Party Libraries: Socket.io, Volley, Retrofit, gson, okhttp, dagger, Glide, butterknife, exoplayer, Picasso.
- Cloud API: OAuth, Facebook, Twitter, Firebase Auth
- Programming: Java, Rx Java, Kotlin, XML (parsing DOM, SAX, Pull), HTML5, SQL, JSON, Multithreading, JavaScript
- Tools: Android Studio, JIRA, Git, Github
- Operating Systems: Windows, Linux
- Database: MySQL, NoSQL, Firestore, Room, Realm, Stored Procedures, Functions, Triggers
